

Headlines Himalaya

Aug 08 - Aug 14

No 417

Editorial Team: Reshma Shakya & Aarchana Kafle

For the 417th issue of Headlines Himalaya, we reviewed 23 news from 12 sources and selected 20 happenings from five countries. In Nepal, Tibetan Argali (*Ovisammon hodgsoni*) is trapped in camera after four decades at Upper Dolpo. While Guwahati in Assam, India demands the need of urban greenery due to transformation of the city into an urban heat island. White Rumped Swift (*Apus caffer*) was spotted for the first time in Lhalu Wetland in Tibet. In Bhutan, villagers are terrorised by the attack of wild elephants.

Headlines Himalaya, a weekly e-News is an attempt to keep our global readers abreast with the happenings in the Himalaya. Please share it with your colleagues and friends. Also, subscription is free. Enjoy!

FEMALE RHINO DIES AT CHITWAN

A female one horned rhino (*Rhinoceros unicornis*) has been found dead in the Bhagaha VDC, Narayani zone, central Nepal. The death of the rhino was suspected to be due to the electric shock received from the electric fence that local people kept for protecting their crops from wild animals. Nevertheless, the horn and hoof of the animal was intact in the body.

TIBETAN ARGALI RE-DISCOVERED AT UPPER DOLPO

Tibetan argali (*Ovis ammon hodgsoni*), an endangered, legally protected species has been captured on camera for the first time on July 19, Upper Dolpo at an elevation of 4,796 metres above sea level after more than forty years. Hunting and harsh environmental condition has driven the species to extinction in Dolpo in past. The species is found in China, India and Bhutan as well.

BAT POPULATION DECREASES IN THE VALLEY

Population of bats residing in Kathmandu valley has drastically decreased one of these days. Rapid urbanization, electrocution, lack of fruit farms and felling of trees have attributed to the death of at least 600 bats in the period of nine years. Kesarmahal and Narayanhiti palace premises in Kathmandu valley and Sallaghari in Bhaktapur are the major habitats of bats.

GOVERNMENT INSTALLS EARLY WARNING SYSTEM

The Department of Hydrology and Meteorology has installed 42 early warning system to inform public about the possible danger of landslides and inundation beforehand. The system has been installed on the bank of the rivers like Kankai, Koshi, Bagmati, Narayani, West Rapti, Babai, Karnali and Mahakali. The radar installed at the bank of river provides information regarding the water level which can send warning ranges from mountain to hilly region.

URGENT NECESSITY OF URBAN FOREST

Guwahati, a largest city of Assam is in need of urban forest as the city has been transformed to heat island in the summer and city of dust in winter. The city does not consist of any parks and children playground. This necessitates inhabitants to plant trees and maintain greenery so as to maintain the environment.

CLEAN DRINKING WATER FOR A RUPEE

In the Katonipur village in Jorhat district of Assam, north-east India clean drinking water is available only for a rupee. The villagers had been dependent on tube well for years but now the task of drawing water will need only the use of a smart card. The users will have to pay Rs.1 for a litre of water before inserting the card to the water dispensing machine.

ELEPHANTS TERRORISES GELEPHU VILLAGES

Villagers in different parts of Gelephu, located in the Indian boarder have been terrorised due to encroachment by elephants. About 25 elephants in two herds have been causing havoc in the villages by damaging crops, houses and other properties. Despite the effort of forest officials, they couldn't succeed to chase the elephants away from the villages as the elephants often come in herd.
