HIMALAYAN BLACK BEAR UNDER RISK
The clash between the human and the wildlife has posed a new threat to the Himalayan Black Bear (Ursus thibetanus laniger). After the clash of the baby bear with the villagers of Jumla, few parts of its body went missing. There has been suspicion of poaching of the body parts since it can fetch huge amount in the black market.
Sept 7

TWO NEPALESE FIRMS AWARDED US-DATA DRIVEN FARMING AWARDS
The US data driven farming awards have been given to two Nepali firms for Innovative Agricultural Solutions in utilizing information and communications technology to improve the agricultural productivity. A Kathmandu-based ICT firm Db2Map received USD 100,000 for its FEO Krishi program that integrates satellite data with government and crowd-sourced information to assess land and soil conditions to help farmers maximize the crop yields. Another firm ICT for Agriculture based in Nepal, bagged a USD 50,000 for their mobile and web-based platform that provides comprehensive agricultural information to rural farmers.

WASTE DISPOSAL HALTED IN THE CAPITAL
Due to the obstruction by the locals at the landfill site in Okharpauwa of Nuwakot district, central Nepal, has resulted in the piles of garbage in the capital city. Talks between the locals and the Municipal Authorities have resulted in vain. According to Kathmandu Metropolitan City Office (KMC), the locals asked compensation and demanded jobs for them as Kathmandu produces about 300 metric tons of wastes which must be disposed daily. The locals agreed to let the disposal of the garbage after being assured to repair the roads leading to the area.

HIGH TEMPERATURE RESISTANT MAIZE DEVELOPED
A new species of maize has been developed by the National Maize Research Programme, resistant to high temperature. The new species of hybrid maize was developed by the programme named ‘Rampur Hybrid-8’ following a four-year long research. It will be further distributed to the farmers across the country which has been expected to have increased the production.
Sept 9
SWAMP TRAPPED RHINO DIES
A female rhinoceros (*Rhinoceros unicornis*) have died after getting stuck in a swamp near the Kuchwani Post in Chitwan National Park, south central Nepal. The rhino was too crippled and was pulled off the mud using an elephant (*Elephus maximus*). Being too fragile, the rhino could not be saved, stated by the authority.
Sept 10

ZONAL HOSPITAL FAIL TO COPE UP WITH RISE IN PATIENT’S INFLUX
Due to the recent flood in the various regions of Nepal, there has been an outbreak of various water borne diseases. The patients complaining of high rise viral fever and dysentery have been visiting the Dhaulagiri Zonal Hospital, western Nepal. Due to the huge influx, there has been shortage of beds in the hospital that has led the hospital authority to adopt alternate measures.
Sept 10

EXPERTS STRESSING FOR VULTURE CONSERVATION
Indian Institute of Technology (IIT), Mandi district of Himachal, northern India, has organized a talk program to discuss the reasons behind the extinction of critically endangered, *Gyps* species of Vulture in India and to discover the ways for its conservation. Experts blamed over the illegal use of Diclofenac drug (non-steroidal anti-inflammatory drug used in livestock treatment) for sharp drop in vulture’s population.

SUPREME COURT ORDER AGAINST COW VIGILANTISM
Supreme Court of India has directed all the states to appoint a nodal officer in each district, to prevent and tackle cow vigilantism incidents. The court also instructed chief secretaries of states to file status report about the actions taken against cow vigilantes. The order came on a batch of petition filed by individuals and NGOs.

Sep 6

ILLEGAL TIMBER SEIZED
Forest officials seized illegal timber worth more than USD 39144.38 in a village of Dhubri district, Assam, north eastern India on 6th September. The driver, including some individuals in the timber loaded truck, was arrested instantly. This incident highlights increasing smuggling of timber in the district.

Sep 7

ORDERS FOR CLOSURE OF ILLEGAL HOT MIX PLANTS
The National Green Tribunal has ordered the government of Uttarakhand, northern India, to close illegal hot mix plants (self-contained bitumen and aggregate mixing plants), after an NGO filed a plea against such plants for causing pollution in the state. With respect to such instructions, the government has started to operate several actions. Of 91 hot mix plants in the state, around 35 hot mix plants have been passed closure orders. The tribunal has also instructed to submit compliance reports in this regard.

WILDLIFE ROAD KILL INCIDENTS INCREASED
Speeding vehicles in highways have turned out to be the killers of wildlife these days. A recent study by Wildlife Institute of India revealed a death count of 222 wild animals including, Leopard (Panthera pardus), Tiger (Panthera tigris), Himalayan Black Bear (Ursus thibetanus laniger), Cheetal (Axis axis) etc. within 8 months in a 30 km stretch on National Highway-74 between Dehradun and Haridwar, northern India. It is reported that such mishaps occurred when animals cross the road in search of water. Experts have recommended for construction of flyovers to safeguard these precious animals.

Sep 8

GLACIAL LAKE FLOODS THREATEN SIKKIM
Climate change has led high altitude glacial lakes of Sikkim Himalaya, susceptible to outburst that may cause potential floods in Sikkim, north eastern India. South Lhonak Lake in northwest Sikkim, (whose size has increased to 145% over the past 40 years) and Gurudongmar Chho at northern Sikkim are the most probable glacial lakes to burst rendering villages of adjoining areas at greater risk.

Sep 9

GRAZING BANNED FOR TIBETAN HERDERS
Tibetan nomads in north eastern region are restricted to use the grazing land. Chinese authorities have imposed stiff fines and even imprisonment as penalties for law breakers in this regard. Though, grazing has been a
traditional custom of Tibetan herders for hundreds of years, officials claimed that this action is undertaken as a scientific need to protect the environment.
